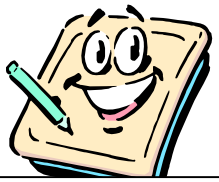
How to do a Science Fair Project

Identify an area of interest. **START** a Journal or Notebook for the Project.



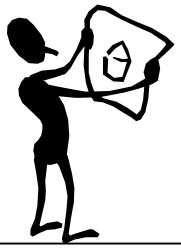
Gather information; review the literature, question people. Write everything in your notebook.

Select specific problems within your area of interest

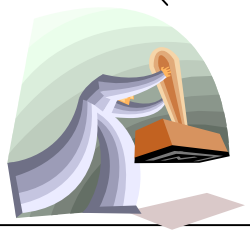
Gather more information; be more specific

State a specific problem

Formulate a hypothesis



Plan how to do your investigation or experiment



Get approval to do investigation or experiment from your teacher & your parents

Revise, if necessary!

Conduct the investigation or experiment

Collect and record results in your notebook.

Analyze and interpret results, using graphs, charts and statistics

Formulate conclusions and write a report

Prepare your Science Fair Display
